KM Table

Time	no. Event	RiskSet	1−h(t)	E(s(t))①
Z_1	1	5	1−1/5 = 4/5	4/5
Z_2	1	4	1−1/4 = 3/4	4/5 * 3/4 = 3/5
$Z_3$②	0	3	1−0/3 = 1	3/5 * 1 = 3/5
Z_4	1	2	1−1/2 = 1/2	3/5 * 1/2 = 3/10
Z_5	1	1	1−1 = 0	3/10 * 0 = 0

Note. ① Estimation of s(t) is $\prod\{ 1 - \text{no. Event} / \text{RiskSet} \}$. ② Censoring time.
