

表 1 案例数据集(Time1 & Time3)分析结果

Time	中位数	四分位差	Wilcoxon Z	p
Time1	1.50	0.2	-6.158	<0.001
Time3	5.55	0.8		

Table 1

Medians, Interquartile Ranges, and Results of Wilcoxon Signed-Rank Test for Time2 and Time3

Time	Mdn	IQR	Wilcoxon		Effect Size	
			Z	p	r	95%CI
Time2	4.35	0.60	-5.998***	< .001	-0.99	[-1.00, -0.99]
Time3	5.55	0.80				

Note. Mdn = median; IQR = interquartile range. A Wilcoxon signed-rank test was conducted to compare the two paired conditions. Effect sizes were quantified using rank-biserial correlations with 95% confidence intervals, computed in R using the *effectsize* package. *** $p < .001$.
